

LIGHTING SOLUTIONS FOR FACILITY APPLICATIONS

EXCEPTIONAL PRODUCTS, SERVICES, AND TECHNOLOGY TO HELP DIFFERENTIATE YOUR FACILITY

From truck bays to warehouses and storage areas to offices, these spaces share a common requirement for energy-efficient illumination to improve workplace safety and visibility. Combine your lighting with controls capabilities to optimize your operations with scheduling, full circuit dimming, smart metering, and more.

FIND RECOMMENDED LIGHTING SOLUTIONS FOR FACILITY APPLICATIONS

Lighting and controls solutions tailored to your facility, combined with the information you need to complete your project. Get spec sheets, BIM and IES files, utility rebate calculations and more.

SPOTLIGHT ON: LIGHTING AND CONTROLS TAILORED TO FACILITY APPLICATIONS

AutoConnect™ Smart & Connected Roadway Lighting

The AutoConnect portfolio provides best-in-class performance with innovative silicone optics, DALI® digital drivers, and DTL® controls. Customizable options are available for the unique needs of Utility, Municipal, DOT and ESCO customers.

Predator® LED Utility Floodlights

By combining the robust mechanical design features with the optical expertise and permanence of prismatic glass, the Predator LED industrial utility floodlight excels as a direct retrofit for both yoke and knuckle mount floodlights.

nLight®

nLight wired and wireless networked lighting controls are easily specified, installed and scaled to grow with your building, perimeter, and site applications. Indoor and outdoor spaces can be controlled seamlessly while both saving energy and meeting code requirements.
