

# LIGHTING SOLUTIONS FOR SUBSTATION APPLICATIONS

# EXCEPTIONAL PRODUCTS, SERVICES, AND TECHNOLOGY TO HELP DIFFERENTIATE YOUR SUBSTATION

Substations are a critical part of your infrastructure and require lighting solutions capable of delivering reliable, energy-efficient illumination to support safe operations. From wall packs and flood lights to area lights to security lights, choose upgraded LED luminaires that can deliver up to 40% savings on maintenance costs when paired with controls for a complete lighting solution.

## FIND RECOMMENDED LIGHTING SOLUTIONS FOR SUBSTATION APPLICATIONS

Lighting and controls solutions tailored to your facility, combined with the information you need to complete your project. Get spec sheets, BIM and IES files, utility rebate calculations and more.

## SPOTLIGHT ON: LIGHTING AND CONTROLS TAILORED TO SUBSTATION APPLICATIONS

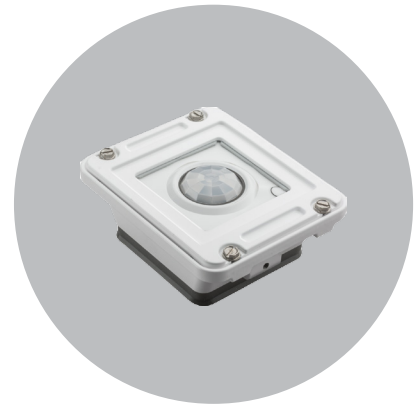

### AutoConnect™ Smart & Connected Roadway Lighting

The AutoConnect portfolio provides best-in-class performance with innovative silicone optics, DALI® digital drivers, and DTL® controls. Customizable options are available for the unique needs of Utility, Municipal, DOT and ESCO customers.

### Predator® LED Utility Floodlights

By combining the robust mechanical design features with the optical expertise and permanence of prismatic glass, the Predator LED industrial utility floodlight excels as a direct retrofit for both yoke and knuckle mount floodlights.

### nLight®

nLight wired and wireless networked lighting controls are easily specified, installed and scaled to grow with your building, perimeter, and site applications. Indoor and outdoor spaces can be controlled seamlessly while both saving energy and meeting code requirements.
